L96 is a concurrent multi-GNSS receiver module with embedded chip antenna. With 33 tracking channels, 99 acquisition channels and 210 PRN channels, L96 supports concurrent reception of up to three GNSS systems (GPS+GLONASS+Galileo). The built-in LNA provides the module with better performance under weak signal areas. The embedded chip antenna reduces the total size of customers’ applications. To meet varied application demands, L96 also provides an external antenna interface.

Compared with using GPS only, enabling multiple GNSS systems generally increases the number of visible satellites, reduces the time to first fix and increases positioning accuracy, especially when driving in rough urban environments.

Combining advanced AGPS called EASY™ (Embedded Assist System) and proven AlwaysLocate™ technology, L96 fully meets the industrial standard and provides greatly reduced TTFF and ultra-low power consumption. EASY™ technology allows L96 to calculate and predict orbits automatically using the ephemeris data (up to 3 days) stored in internal flash memory, so the module can fix position quickly even at low signal levels and provide low power consumption. With AlwaysLocate™ technology, L96 can adaptively adjust the ON/OFF time to achieve balance between positioning accuracy and power consumption according to the environmental and motional conditions.

Its super performance makes L96 ideal for automotive, industrial and consumer applications. Extremely low power consumption makes it easier to be applied to power sensitive devices, especially portable applications.
**GNSS Features**

**Receiving Bands**

- GPS/Galileo L1 C/A: 1575.42MHz
- GLONASS L1 C/A: 1602.5625MHz
- BD2 B1 C/A: 1561.098MHz

**Channel Numbers:**
- 33 Tracking Channels
- 99 Acquisition Channels
- 210 PRN Channels

**SBAS:**
- WAAS, EGNOS, MSAS, GAGAN

**Horizontal Position Accuracy:**
- Autonomous: <2.5m CEP

**Velocity Accuracy:**
- Without Aid: <0.1m/s

**Acceleration Accuracy:**
- Without Aid: <0.1m/s²

**Timing Accuracy:** ≤ 10ns

**TTFF @-130dBm with EASY™:**
- Cold Start: <15s
- Warm Start: <5s
- Hot Start: <1s

**TTFF @-130dBm without EASY™:**
- Cold Start: <35s
- Warm Start: <30s
- Hot Start: <1s

**Sensitivity:**
- Acquisition: -148dBm
- Tracking: -165dBm
- Reacquisition: -160dBm

**Dynamic Performance:**
- Maximum Altitude: Max. 18000m
- Maximum Velocity: Max. 515m/s
- Maximum Acceleration: 4g

**Interfaces**

**I2C Interface:**
- Max. bit rate up to 400kbps

**UART Interface:**
- Adjustable: 4800bps~115200bps
- Default: 9600bps
- Update Rate: 1Hz (Default), up to 10Hz
- I/O Voltage: 2.7V~2.9V

**External Antenna Interface:**
- Antenna Type: Passive or Active
- Antenna Power Supply: External

**Electrical Characteristics**

**Power Supply:**
- 2.8V~4.3V, typical 3.3V

**Power Consumption @Acquisition:**
- 22mA @3.3V, -130dBm (GPS)
- 25mA @3.3V, -130dBm (GPS+GLONASS)

**Power Consumption @Tracking:**
- 20mA @3.3V, -130dBm (GPS)
- 20mA @3.3V, -130dBm (GPS+GLONASS)

**Power Saving Modes:**
- 2.8mA @AlwaysLocate™
- 7uA @Backup Mode
- 500uA @Standby Mode
- 4.8mA @Periodic Mode

**General Features**

**Temperature Range:** -40°C ~ +85°C

**Dimension:** 14.0mm × 9.6mm × 2.5mm

**Weight:** approx. 0.6g

**Protocols:** NMEA 0183/PMTK

---

**Note 1:**

GPS+GLONASS is the default GNSS configuration.

**Note 2:**

Average power consumption under periodic mode of 3s tracking mode & 12s standby mode.
