Quectel BC66-NA
Compact LTE Cat NB2 Module with Ultra-low Power Consumption

BC66-NA is a high-performance, multi-band LTE Cat NB2 module with extremely low power consumption. The ultra-compact 17.7 mm × 15.8 mm × 2.0 mm profile makes it a perfect choice for size sensitive applications. Designed to be compatible with Quectel GSM/GPRS module M66 in the compact and unified form factor, it provides a flexible and scalable platform for migrating from GSM/GPRS to NB-IoT network. Also it is pin-to-pin compatible with Quectel LTE Cat NB1 module BC66/BC65 and LTE Cat NB2 module BC68, and additionally supports band 71 and band 85 to accommodate more operators. BC66-NA provides abundant external interfaces and protocol stacks, providing great convenience for your applications.

The surface-mount technology makes BC66-NA an ideal solution for durable and rugged designs. The low profile and small size of LCC package allow it to be easily embedded into space-constrained applications and provide reliable connectivity with applications.

Due to the compact form factor, ultra-low power consumption and extended temperature range, BC66-NA is a best choice for a wide range of IoT applications, such as smart metering, bike sharing, smart wearables, smart parking, smart city, security and asset tracking, home appliances, agricultural and environmental monitoring, etc. It is able to provide a complete range of SMS and data transmission services to meet client-side demands.
